**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22 and 41-45, drawn to marking indicia and a method for creating indicia, classified in class 235, subclass 462.09.
- II. Claims 23-32 and 46, drawn to a method of reading indicia, an imaging and image capture apparatus, and a reading device, classified in class 235, subclass 462.10.

Note: Claims 26-30 recite a method for creating an indicia, however depend on claim 23, which discloses a method for reading indicia. It is assumed that claims 26-30 should instead recite a method for reading indicia.

- III. Claims 33-40, drawn to a marking apparatus and a method for marking, classified in class 700, subclass 224.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of reading indicia does not require the particular indicia disclosed in invention I. The subcombination has

separate utility such as the indicia disclosed in the subcombination may be read by any other reading means.

3. Inventions I and III are also related as combination and subcombination. In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the marking apparatus and method of marking does not require the particular indicia disclosed in invention I. The subcombination has separate utility such as the indicia disclosed in the subcombination may applied to any object in various methods or with a different marking apparatus.

4. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as III. Invention II may be used to read any indicia, regardless of how the indicia is applied or marked on an object. See MPEP § 806.05(d).
